Join this free online learning opportunity addressing the major challenges in phosphopeptide analysis. We will address strategies for phosphopeptide enrichment, techniques minimizing the phosphate group loss during sample preparation, mass spectrometry method setup, and best practices for data analysis and interpretation. This workshop will provide you with insights and practical tips to ensure accurate and comprehensive phosphopeptide analysis.

The workshop is aimed at both novice and intermediate users. We have planned time to answer your questions.

Participation is free of charge.
